Compression Stockings

BRILLANT

MICRO

Modern BRILLANT® compression stockings are made of highly elastic material containing microfibre. Thanks to the high elasticity the stockings are easier to put on and they give a nice sheen to the legs.

#### Main advantages

- > provides relief to tired and heavy legs
- > cool in summer and warm in the cooler months
- > silky, soft touch
- > enhances the natural elegance of the legs
- > easy to put on and comfortable to wear
- > available in all styles
- > available in compression classes I and II
- > available in beige and black

Elegant MICRO® compression stockings are made of very fine knitwear with a high microfibre content. They have the unique Micro effect, which is a technology in which the lycra fibres are woven around so that they never come into contact with the skin. The Micro effect lowers the risk of skin irritation to a minimum, making them particularly suitable for people with sensitive skin. Their high elasticity makes slipping the stockings on much easier and wearing them more comfortable.

#### Main advantages

- > good for sensitive skin
- > cool in summer and warm in the cooler months
- > silky, soft touch
- > easy to put on and comfortable to wear
- > available in all styles
- > available in compression classes I, II and III
- > available in beige and black
